SUMMARY

Product designer with 10+ years across B2B and B2C products, with experience spanning hands-on interface design, design leadership and product management. Leads projects end to end, from research and concept to final UI, builds design systems that scale, and designs AI decisioning, agentic and conversational experiences that stay explainable and keep people in the loop.

EXPERIENCE

Optimove

B2B marketing optimization platform

Feb 2025 - Present

Senior Product Designer

- Own design strategy for AI Decisioning Studio, orchestration and execution.
- Lead UX for AI Decisioning Studio, defining what the AI decides and what marketers configure and inspect.
- Led design for Streams 2.0, a chat-first journey builder where marketers and AI agents build campaigns together.
- As product design's AI Champion, build the AI-assisted workflows and tools that bring AI to designers, PMs and engineers.

PLAYSTUDIOS

B2C mobile games

Apr 2024 - Feb 2025

Lead Product Manager

- Led Tetris Block Party, a new casual puzzle game on the worldwide Tetris brand, and brought it to soft launch.
- Owned the game's creative direction and narrative.
- Built the roadmap and mediated between the creative, development, economy and data analyst teams.
- Planned and built all core and LiveOps features, starting from the UX.

EveryBuddy Games

B2C mobile games

Nov 2020 - May 2024

Lead Product Designer → Head of Product Design

Promoted to Head of Product Design in June 2021. Led a 15-person multidisciplinary studio: 4 product designers, 8 graphic designers, 2 animators and a sound designer.

- Led and mentored the studio across product, art, motion and sound, and kept one consistent player experience across game features while the company scaled.
- Led design of Lucky Buddies, a slot-driven mobile RPG: game UI, branding, motion and specs.
- Tied design strategy to business goals and designed monetization features that balance player experience against revenue.

Palo Alto Networks

B2B cybersecurity

Mar 2020 - Nov 2020

Product Designer

- Designed data-dense B2B cybersecurity interfaces, grounded in user research and usability testing.
- Turned complex technical requirements into simple flows with product and engineering.

Playtech

B2B iGaming software

Jan 2018 - Mar 2020

Lead Product Designer

Joined through the Beehive BI acquisition.

- Led design for Campaign Manager and the real-time Player Journey features of Playtech's Marketing 360.
- Worked with stakeholders and was responsible for product quality.
- Created a design system used across all Marketing 360 features.

Beehive BI

B2B marketing optimization platform

Apr 2015 - Jan 2018

Lead Visual / Product Designer

Design owner of the Beehive BI platform.

- Owned the platform's design end to end, from wireframes and prototypes to the final UI.
- Turned complex business data into clear, easy-to-navigate dashboards.
- Responsible for the company's brand and visual identity.
